## Applied Learning

Students in the BS in criminal justice concentration in criminal intelligence program are required to complete an applied learning or research experience to graduate from this program. The requirement can be met by successfully completing CJ 407 Introduction to Research Methods.

Students in the traditional course have a hands-on experience serving or benefiting a community agency. Research questions are developed in conjunction with the agent of the agency identified at the beginning of each semester.

Students in the online course learn how to apply the course concepts thus far. Each student identifies four research study ideas directly linked to their everyday lives.
